Category:Lists of electronic engineering software  
Computer programming Category:Lists of  
software it:RAD StudioThe revelation that Russian  
state-sponsored hackers breached the U.S. power  
grid last year to steal energy company trade  
secrets from the cyber Pearl Harbor just had an  
impact on a much bigger scale than a mere rash  
of revenge porn. It's also sent a shock wave  
through the technology and energy industries,

---

shaking up the U.S. energy sector. The mainstream media has been quiet on the story, but, in the U.K., the Financial Times broke the story Tuesday. After reviewing a leaked copy of a November report on the hack, the paper was able to report that “officials in the U.S. and Europe learned that hackers affiliated with the Russian government may have caused blackouts in 14 U.S. states last year.” The hackers were not targeting a specific company, but were instead “trying to penetrate the energy systems of an unnamed U.S. region,” the report said, according to FT. If hackers successfully penetrated the U.S. energy grid, as the FT reported, “they could wreak havoc, disrupt supply chains and cause blackouts if they were able to gain access to sensitive information.” The hack would be the first of its kind for the U.S. energy sector. Earlier this year, the European Union took on a similar effort to protect its own critical infrastructure from cyber intrusions, spooking the U.S. While the U.S. and European Union have raced to get their own cyberdefenses in place, the U.S. has sought to play down the incident. In the U.K., Energy Minister Amber Rudd declined on Tuesday to comment on the incident, and Energy Secretary Rick Perry said there was “no direct connection”

---

between the hack and a Russian energy company.

The U.S.'s failure to acknowledge the hack has been a disappointment to European officials, who are currently revising their own cyberdefenses. A leading expert on hacking believes that if the U.S. can't take a threat seriously, it's "not a good sign for the rest of the world." The U.S. has managed to keep its vital infrastructure under the control of "the traditional energy industry," which, despite the massive growth of
